NON CLOG VERTICAL SUBMERSIBLE PUMP

These pumps are suitable for pumping soiled & wastewater. With their 50 mm solid handling capacity, they are able to pump liquids with larger suspended solids like fibres, textiles, etc. They are used for various applications in the public sector, private sector and trade industries.

About Pump

Features

- Float Switch Internal or External can be provided for dry running protection
- Impeller Design Channel, Vortex, Cutter and Grinder
- Non Clog

M.O.C

- CI
- SS304
- SS316

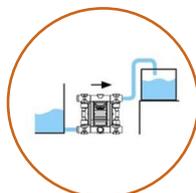

Specifications

- Flow Range - Max 1800 Lpm
- Frequency - 50 Hz
- Liquid Temp.- Max 40 Deg C
- Max. Head - Max 36 mwc
- Solid Passage Spherical - 50 mm

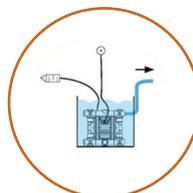

Applications

- Buildings
- Effluent Treatment Plants
- Ground Water Drainage
- Hospitals
- Industrial Wastewater
- Schools & Colleges
- Sewage Treatment Plants
- Submersible Cutter Sewage Pumps
- Wastewater Treatment System
